

BRED FOR PURPOSE

The UltraWhite is a wool-shedding, terminal and maternal sheep breed developed to combine high performance, rapid growth and low-maintenance management in an easy-care sheep.

Since its development began in 2005, the breed has been carefully shaped to meet the needs of modern sheep producers across a wide range of climates and production systems.

WHY BUY FROM A REGISTERED ULTRAWHITE MEMBER?

- Mandatory performance recording (*Lambplan*)
- Mandatory Brucellosis accreditation (*from 2026*)
- Mandatory DNA of all registered stud sires (*from 2027*)
- Gives buyers confidence they are purchasing a true UltraWhite

"We are a progressive breed society shaping the future of Australian sheep production."
